When is the hound crated?

- 8 Hour Work Day
- Bed Time

How does the hound handle being crated?

Well. He gets a PB kong during work day. He is fed in his crate. He is quiet while in his crate. His crate is also one of his "safe places" he will retreat to if he is feeling nervous.

What does the hound enjoy?

Naps, ear scratches, food/treats. He is getting a little more confident each day and spending more time in the main area of the house with us.

Does the hound have any fears?

Loud noises, people coming directly up to him. Stairs, slippery floors. He did fine with vacuum.

What type of temperament does the hound have? (Shy, outgoing, confident, etc.)

Jack is a shy boy. He is making great progress with us but will need some continued patience and encouragement to help him come out of his shell. He may benefit from having another confident hound/canine in the home.

How does the hound handle new situations?

Timid. Will retreat to his safe space (bedroom dog bed or crate) and emerge when he is ready

What type of food are you currently using?

Diamond Naturals All Life Stage Chicken & Rice
