Played with my parent's 8lb and 11lb Shih Tzu mixes so well! Proper introductions were done with muzzle and leash. She played so gently and had a great time with the small pups.

### **Comments (Young Children)**

Haven't experienced Maple around small kids but she's a gentle and sweet girl, I do not have any reason she'd have a problem around well behaved kids.

### **When is the hound crated?**

- Both

### **How does the hound handle being crated?**

Very well! Maple is one of those greys who actually REALLY likes her crate. It is definitely a safe and comfortable space for her. She goes in on her own, often. She has been a very good girl home alone in her kennel.

### **What does the hound enjoy?**

walks, snoozing, zooming in the yard, lounging near you while you do quiet activities

### **Does the hound have any fears?**

Stairs seem to be something she'll need some work on. And I wouldn't really call it a "fear" necessarily? But she is not a fan of being picked up, she acts a little offended! She'll run away from you sometimes after you've lifted her. She gets over this quickly, but it is definitely something she does not enjoy!

### **What type of temperament does the hound have? (Shy, outgoing, confident, etc.)**

reserved, quiet, mellow, a little shy, not very brave, sweet, silly, very loving.

### **How does the hound handle new situations?**

good! Maple has enjoyed car rides, has visited Chow Hound, and has experienced friends and family coming over to the house. She's done great!

### **What type of food are you currently using?**
