Comments (Young Children)

I haven't seen her with young children yet. She is learning not to jump on people, but I would be cautious to make sure she doesn't jump on young children.

First thing in the morning, last thing at night before going to bed, whenever we come home, and in between if she "asks" to go out by going to the back door.

Only does 2 or 3 on her own at this point.

- 8 Hour Work Day

How does the hound handle being crated?

She is fine with being crated.

What does the hound enjoy?

Stuffed toys, Benebones, walks, attention, pets and affection.

Does the hound have any fears?

Not that I've seen. Not sure if she is afraid or just stubborn, but I haven't gotten her to jump up into the back of my vehicle yet.

What type of temperament does the hound have? (Shy, outgoing, confident, etc.)

Outgoing, confident, busy, wanting to be in the center of the action.

How does the hound handle new situations?

She usually handles new situations pretty well. She was slightly nervous when she first came into our home--didn't eat at first and was a little unsure as it was all new--but seems able to adapt quickly and is pretty confident in new situations from what I have seen.
