When is the hound crated?

- Not Crated At All

How does the hound handle being crated?

I work from home, so we don't crate Louise. We do have a crate in the living room, and she'll go in her crate and take a nap sometimes.

When we leave, she is muzzled and we put up a baby gate. No issues

What does the hound enjoy?

Walks, Treats, being brushed, petted, laying in her bed or on the couch. She loves car rides!

Does the hound have any fears?

Not a fan of Thunderstorms and Fireworks. She doesn't hide or get scared, she gets upset and barks.

What type of temperament does the hound have? (Shy, outgoing, confident, etc.)

A little bit of everything. She can be shy around new people, but we've noticed when we take her for walks that when she sees a person she'll wag her tail and stop because she wants to meet them.

How does the hound handle new situations?

Really well, she's still not sure about meet and greets and why we're just standing there instead of walking, but she's starting to get the hang of it.
