When is the hound crated?

- Not Crated At All

How does the hound handle being crated?

She loves being crated and spends time in her crate willingly during the day and at night. I only opt to crate her when I will be gone for a long time.

What does the hound enjoy?

She loves sleeping on my bed and in her crate, getting cuddles, putting her forehead to your chest, playing chase, dog parks, long walks, meeting new people, and she is curious about water.

Does the hound have any fears?

Sometimes she gets startled by passing cars, but otherwise no noted fears.

What type of temperament does the hound have? (Shy, outgoing, confident, etc.)

She is sweet and gentle, but not shy, just quiet. She can be goofy.

How does the hound handle new situations?

She is cautious at first but quickly opens up and has learned to like just about everything I've thrown at her.

What type of food are you currently using?
