When is the hound crated?

- Bed Time

How does the hound handle being crated?

At first he was not happy about it, but now it's his cozy little nest

What does the hound enjoy?

FOOD. Aaron is INCREDIBLY food motivated. We've had to correct him trying to bump plates of food out of hands: he'll ram his head into your elbow to try and force you to spill. If you give him a puzzle toy, he'll rip the doors off to get the treats.

Does the hound have any fears?

Not really. He got attacked by a small dog and thought it was a game. He's not a fan of loud noises, and he hates snow and being cold, but that's not fear really.

What type of temperament does the hound have? (Shy, outgoing, confident, etc.)

He's quiet and sweet mostly. He LOVES pets and cuddles, and if you are cuddling another creature, he will trot over and nose his way in pretty much every time. The only time he gets bold is when food is involved, and then he'll get bouncy and will spin and dance.

How does the hound handle new situations?

Aaron started a little apprehensive, but now he's just cheerful. His tail might be lower, but it'll be wagging and his ears will be engaged.

What type of food are you currently using?

Blue Diamond Chicken
