Comments (Cat Safe)

I am debating between yes and correctable. She is very interested in one of the two cats. She plays with the other cat but is not dangerous. Packie does have high prey drive.

Comments (Young Children)

She is scared of young children.

Turn Out Routine

She goes out roughly every few hours with other hounds. If one of them goes down the stairs, she follows. She will go down the deck stairs on her own if she needs to use the bathroom.

Make sure she has the chance to use the bathroom immediately after breakfast.

When is the hound crated?

- Bed Time

How does the hound handle being crated?

She lives with a personal hound that is not crated and once in a while she will protest by sitting on the other hound's bed but is fairly easy to walk to her crate.

What does the hound enjoy?

Food, playing, walks, pets.

Does the hound have any fears?

Loud noises, bicycles, cars, loud blenders, fast movements, the dark, and being shouted at.

What type of temperament does the hound have? (Shy, outgoing, confident, etc.)

She is a mix of shy initially and becomes outgoing as she gains confidence.

How does the hound handle new situations?

If there is something that makes her fearful, she acts like a fearful dog. If she comes in with less fear, she is outgoing. In most cases, she mirrors my personal hounds.
