Small Dog Safe

Correctable

Comments (Small Dog)

Recently when we have been on walks or out in public he has started to show interest in small dogs. He was easily redirected, but I would err on the side of caution.

Cat Safe

No

Good With Young Children

Correctable

Comments (Young Children)

He gets excited easily and he nips and jumps when he is excited.

Turn Out Routine

When he goes outside he wears a muzzle with a poop cup if we aren't outside to play. He is interested in his feces. He goes out and comes back well and is on a fairly consistent schedule. He will need to go out right before and right after easting to avoid accidents.

When is the hound crated?

- Both During The Work Day and At Bed Time

How does the hound handle being crated?

He is crated at night. I tend to lie down and read for a bit before bed. He will come in and lay in his crate. When I am turning in for the night I will then lock the crate. He is only crated during the day about twice a week because someone is usually home. He does not like to go in when he knows we are leaving. He is food motivated, so we do give treats or kibble to get him to go in.

What does the hound enjoy?

He loves stuffed toys and his rubber kong toy. When we are outside he loves to play chase with you. If you start to chase him he will zoomie around the yard. Dice also enjoys walks, but needs a firm but caring leader. He is easily scared by noises and if he sees his reflection in a store window.

Does the hound have any fears?

Loud noises and sometimes his reflection scares him on walks.

What type of temperament does the hound have? (Shy, outgoing, confident, etc.)

Extremely outgoing and playful. He is a velcro boy and will want to be every where you are.

How does the hound handle new situations?

When going somewhere new he looks to his people for encouragement. Once he knows he is safe he relaxes and opens up. He loves when visitors come over though. He knows he will get lots of pets.
